**Announcement of Commencement of Medical Examinations for Grand HIMEDIC Club
“HIMEDIC Tokyo Nihonbashi Course”**

HIMEDIC, Inc., a wholly owned subsidiary of Resorttrust, Inc. (“the Company”), operates the “Grand HIMEDIC Club,” a membership-based comprehensive medical club that provides services such as highly accurate medical examinations and general health management jointly with partner medical institutions. This is to announce that medical examinations for the “HIMEDIC Tokyo Nihonbashi Course,” most of which are conducted in Nihonbashi, Tokyo, will start on June 3, 2020.

Medical examinations for the “HIMEDIC Tokyo Nihonbashi Course” are commissioned to Midtown Clinic Medical Corporation, which has a track record of providing medical examinations for the HIMEDIC • Midtown Course. Employing state-of-the-art medical equipment including PET/CT scanners (administered by Keio University Hospital) and 3.0-Tesla MRI scanners, a system is in place to enable a high rate of early diagnosis for cancer, cerebral vascular disease, and cardiovascular disease.

Moreover, focusing on gender-based medicine and preemptive medicine, new value, that is, provision of support for active aging (prevention of infirmity), is created. The HIMEDIC Tokyo Nihonbashi Course is the first course of the Grand HIMEDIC Club to introduce AI-based forecasting of the risk for onset of diabetes, which is one of the causes of dependence on long-term care. Analysis of sex hormones, which play essential roles in protecting health, is also introduced to enrich preventive medicine.

The HIMEDIC Tokyo Nihonbashi Course is the first course of the Grand HIMEDIC Club to offer pre-assessment (including an interview before the medical examination). Male and female doctors exclusively assigned to the HIMEDIC Tokyo Nihonbashi Course interview examinees prior to medical examinations (from one month to one week in advance) and the information obtained will be utilized for diagnoses based on the results of the medical examinations. For health consultation services exclusively for the HIMEDIC Tokyo Nihonbashi Course members, the Club’s doctors provide follow-up of general health management, considering gender differences and referring to the cumulative data collected over the years as well as the results of medical examinations.

At Keio University Hospital where PET/CT scans are administered, reception and waiting areas are prepared exclusively for HIMEDIC. At the examination venue in Nihonbashi, completely private rooms are available for individual examinees to ensure comfort and privacy.

On the same floor is the Nihonbashi Muromachi Mitsui Tower Midtown Clinic, which offers company health checkups and outpatient care such as internal medicine. A waiting area exclusively for HIMEDIC members is available in the outpatient zone.

In addition to medical examinations, “Grand HIMEDIC Club” offers a wide range of support services based on accumulated medical examination data on members, including referrals to medical institutions in the event that a disease is discovered and health consultation services from the Club’s doctors. There are eight medical examination courses, including HIMEDIC Yamanakako, HIMEDIC Osaka, HIMEDIC • Tokyo University Hospital, HIMEDIC • Midtown, HIMEDIC Tokyo Bay, HIMEDIC Kyoto University Hospital, HIMEDIC Nagoya, and HIMEDIC Tokyo

Nihonbashi.

“Grand HIMEDIC Club” is implementing thorough safety measures so that members can take examinations with peace of mind despite the COVID-19 pandemic. For details of the safety measures, please refer to the Grand HIMEDIC Club website (<https://www.himedic.jp/news/>) (in Japanese).
