FOR IMMEDIATE RELEASE

Company name	Resorttrust, Inc.
Representative	Ariyoshi Fushimi, President
Code	4681, First Section of the Tokyo and Nagoya Stock Exchanges

**Announcement of Membership Sales Launch
for New Courses of “HIMEDIC Yamanakako Club”**

HIMEDIC, Inc., a wholly owned subsidiary of Resorttrust, Inc. (“HIMEDIC”), operates “HIMEDIC Yamanakako” of the “Grand HIMEDIC Club,” a membership-based comprehensive medical club that provides services such as highly accurate medical examinations and medical consultations jointly with partner medical institutions. This is to announce that on April 14, 2021, HIMEDIC will begin accepting applications for membership in “HIMEDIC Yamanakako Club Double Course Neo” and “HIMEDIC Yamanakako Club Double Course Neo10,” new courses of “HIMEDIC Yamanakako Club.” Medical examinations for the courses are scheduled to begin in July.

“HIMEDIC Yamanakako Club Double Course Neo” and “HIMEDIC Yamanakako Club Double Course Neo10” were developed in response to members’ desire to protect the health of their families and employees. The feature of the new courses is that they allow up to five people, including the member, to receive medical examinations, as well as to access medical services such as medical consultations and special outpatient services. These courses are designed to help members and the people important to them, including their families and employees, to enjoy a long and healthy life.

The medical examinations will be conducted at Yamanakako Clinic, the birthplace of HIMEDIC’s medical examination system, which established the world’s first PET-based examination system, referred to as the Yamanakako System.

Due to the spread of COVID-19, the number of people receiving cancer screenings in Japan has decreased, and there are concerns that cancer detection may be delayed. Yamanakako Clinic offers highly accurate medical examinations in a resort area overlooking Mount Fuji and Lake Yamanaka, where a limited number of people can maintain social distance in a relaxing space, with thorough measures in place to prevent the spread COVID-19, so that people can receive medical examinations with peace of mind.

About HIMEDIC Yamanakako Club

HIMEDIC Yamanakako Club was opened in 1994 in response to requests from Resort Trust hotel members who desired to stay healthy for the rest of their lives so that they could enjoy life in their own ways. It was the first in the world to introduce the use of PET in medical examinations, and succeeded in detecting early-stage lung cancer, which was difficult at the time, by combining multiple tests using advanced equipment. The resulting system became internationally referred to as the “Yamanakako System” and became the basis for the creation of guidelines for the use of PET in medical examinations. More than a quarter of a century later, it has become the cornerstone of the Grand HIGHMEDIC Club, which now has eight courses at nine bases, providing

support for the early detection and treatment of cancer, heart disease, cerebral vascular disease and other diseases.
